2026 Research Note Guidelines

Overview

The research note roundtable session has been rated by participants in previous years has highly valuable. It is a way to gain feedback from academics on your research in a constructive, safe and collegiate environment.

If you wish to discuss your work at a Roundtable Session, you **MUST register and submit** a short Research Note before **Monday 21 September 2026.**

Your Research Note should follow **APA 7th edition referencing**, include **page numbers**, be in **PDF** format and be **3-5 pages in length** (excluding references). Submissions longer than this will be rejected.

Follow the submission process to submit your research note (see anzamconference.org).

Your Research Note will be circulated to both the students and academics in your group in advance of the Roundtable Workshop.

It should explain your research in a clear and succinct manner – remember, not everyone at your table will know your specific area. The following guidelines may help you to structure your Research Note. You will also find a pre-formatted template document on the following pages which you should use for your submission. Please note the word limits and **do not exceed the 5-page limit** (excluding references).

Guidelines

Title	Include the working title of your thesis/dissertation.
Keywords	Include at least four (4) keywords to describe your research. This will assist us in matching you with a relevant session. At least one keyword should be a research method.
Introduction	Outline the phenomenon that you are investigating and state why it is important; capture the reader's interest.
Research Questions	Clearly state your research question(s).
Theory Development	Briefly review the 2-3 main constructs underpinning your research and explain how your new theory or approach fits into the current literature.
Method	Summarise how you intend to explore or are exploring this phenomenon.
Results/ Discussion	Report your findings if you have already completed some or all data collection and analysis.

See the following page for the pre-formatted template document.

A Word template document for download.

Title: Subtitle

Author Name

Institution Name

City, Country

Keywords: *[AT LEAST 4, INCLUDING METHOD]*

Date: dd/mm/yyyy

Introduction

Outline the phenomenon that you are investigating and state why it is important; capture the reader's interest. (200-300 words)

Research Question(s)

Clearly state your research question(s).

Theory Development

Briefly review the 2-3 main constructs underpinning your research and then explain how your new theory or approach fits into the current literature. (750-1000 words)

Subheading 1

Text

Subheading 2

Text

Method

Summarise how you intend to explore or are exploring this phenomenon; depending on your progress, this may have more or less detail of what you will do or have done.

Results / Discussion

You can report your findings here if you have already completed some data collection and analysis, but this is not required.
